VACATION TIME

go for a week, a month
or more, but go!
DELIGHTFUL RESORTS
FROM COAST TO COAST
offer ample scope for your
favored recreations

EAST

MINIKI, MUSKOKA LAKES, 1,000 ISLANDS—There are only a few of the resorts in Canada which is a suitable land of Heart's Desire. In this province there is a resort to suit every taste and purse.

THE ANCIENT QUEBEC—The "Walled City of North America," where old-world customs and landmarks still abound. Many lovely resorts on the Lower St. Lawrence, in the heart of French Canada.

THE PROVINCES BY THE SEA—Seaside resorts and vacation playgrounds abound in the Maritime Provinces. Fishing, sailing, forest rambles make each day a joy.

WEST

CANADIAN ROCKIES—Vast the playground of Canada's wonderful West—a land of mystery—of towering, snow-capped mountains. Stay over at Jasper National Park—enjoy the superb hotel service—mountain-biking and mountain climbing. Jasper Park Lodge near Hwy 80 to Banff, Alberta.

TRIANGLE TOUR—Wonderful from Jasper to the scenic beauty of the Triangle Tour—along the mighty Shuswap to Prince Rupert—by boat through the Stikine River of the North Pacific to Vancouver—back through the world-famous mountain scenery of the Coast Range to Seattle.

Take a boat trip to Alaska, British Columbia, and the Yukon. The Canadian National Railway offers a complete service to the coast or Prince Rupert. En route, the "Shuswap" for Lake Athabasca and the "White Pass and Yukon Railway" for the famous Klondike Trail of '90—a trail of gold and a constant panorama of magnificent scenery.

Winners at Cards.

At the whist card party held Friday evening at the home of Mr and Mrs Jansen, the prizes were awarded to—
Ladies 1st, Miss Jansen
Ladies consolation, Mrs Foerster
Men's 1st, W Foerster
Men's consolation, Ph Fahr

The event was a birthday celebration, and quite a number were present. Refreshments were served.

Prices of Threshing.

An effort had been made by some local threshermen to have a meeting called at Stony Plain for the purpose of agreeing on the prices to be charged for threshing, but, to date, the meeting has not been called. However, the general understanding seems to be that the prices which will prevail will be: Oats 3c, barley 4, wheat 5; these prices to include all the help necessary to put the grain in the granary or wagon box.

At a meeting of threshers last week at Calmar prices similar to the above were adopted, and the threshers present agreed that provided they did not get jobs at the above prices they were willing to put their machines back in the sheds. This agreement was signed by a big majority of the threshers present. Some farmers, who, were present at the meeting, objected to the prices.

Duck Season Opens.

Today, Sept. 15th, at noon, sees the opening of the shooting season for ducks. Reports from the North indicate that the wild fowl are moving south earlier this year than usual; and also show that, while the smaller breeds of the duck family have not hatched out to the numbers usually expected, those of the mallard class are very plentiful, and these will be fat and plump, to boot, thanks to the earlier harvesting operations of the farmer class this year. The price for a duck, goose and snipe license has slipped up two bits this season, and now costs \$2.50 for a resident. During the month of September the bag limit for ducks is 15 birds.

With regard to "persons entitled to hunt without a license" The Game Act (page 7) says:

Any person who (a) is a resident within the meaning of this Act; (b) is in the occupation of land as owner, purchaser, lessee or homestead which is used for farming or ranching purposes; and (c) resides and carries on the business of a farmer or rancher upon such land or some part thereof, as well as any member of such person's household, may hunt, take, shoot at, wound, and kill game birds upon or over such land without any license during such times as any person holding a game bird license purports to this Act may hunt, take, shoot at, wound, and kill any game bird as if he were the holder of such license.

Taxes—Who Is Responsible For Them?

It is an old saying, and true, that there are at least two things which no person in the world can escape—death and taxes. So far as the former is concerned it is inevitable; it may be postponed by rational living, by observance of the laws of nature and hygiene, by the exercise of "safety first" principles, but, in any case, it is inevitable.

Taxes, too, are inevitable if orderly government, a properly organized community life, and essential public services are to be maintained, but, and this is the important thing, the taxpayers have it within their own power to determine the size and extent of the tax burden they shall carry.

Begin a discussion of the subject of taxation and the chances are that nine out of every ten persons, yes, ninety-nine out of every one hundred, will at once lay the blame for their uneasy heavy burden upon Government, either Federal, Provincial, Municipal, or all three combined. Governments, of course, are partly responsible, but the taxpayers themselves are even more responsible, and it is high time Mr. and Mrs. Taxpayer realized this fact of their responsibility.

In the first place, the taxpayers are responsible for creating the Governments. It was their votes which placed the Governments in power. It is by virtue of the votes of the taxpayers that Governments continue in existence to apply their policies, impose taxes, and spend the proceeds of those taxes, or, contra, are ejected from office. The taxpayers cannot escape this primary responsibility.

Secondly, Governments are constituted of groups of human beings, with all the failings of human beings. Placed in office they naturally desire to stay there, while opposing groups out of office just as naturally desire to get in. All these groups, the majority for the support of a majority of the taxpayers, who are the final arbiters. If one group presents an attractive programme of public works, involving large expenditures, much employment, and consequent free spending of public monies, contrasted with a more conservative and economical programme advocated by an opposing group, and the people endorse the former and reject the latter, then, again, it is the taxpayers who are responsible for the ensuing large borrowings on the public credit, the creation of a large public debt, and the resultant heavy taxes to pay the charges on that public debt. The group in office may be responsible for proposing an unwise policy, but the taxpayers themselves set the seal of their approval to that policy and issued instructions that effect be given to it.

In the third place, there has never been a government entrusted with the duties of administering the business of all the people which has not been confronted with demands from the people that it do this or that, provide this service or construct that public work, extend financial support to this organization or that project. The cabinet of ministers, or municipal council, as the case may be, may feel that the action urged upon them is unwise, but if the clamor is loud enough, and the demand of the taxpayers themselves urgent enough, they will, as representatives of the taxpayers and depending upon their support, yield to such demands. The result is more and heavier taxes. Governments must accept some responsibility for yielding to such demands when their judgment ordered otherwise—there are times when it is the duty of Government to reluctantly yield to public clamor and refuse their demands, even when it means the defeat of the Government and the placing in office of another group which will carry out those demands—but the major responsibility rests upon the taxpayers, the voters.

Then these self-same taxpayers make bitter complaint because their taxes are heavy. They discover they cannot pay the taxes imposed upon them by reason of the very expenditures and borrowings they themselves insisted their Governments should make. When it is too late, because the obligations have been incurred and must be met, they demand that their taxes be reduced, or wiped out altogether. And when a responsible Government, entrusted with the preservation of the credit of the Dominion, a Province or a Municipality, declines to do this, because it cannot be done honestly, and it done dishonestly would react to the further disadvantage of the taxpayers, then many of the taxpayers make the further mistake of listening to, and being guided by, other groups which promise to do what is being demanded. In his dignity Mr. and Mrs. Taxpayer is willing to jump out of the frying pan into the fire.

When the taxpayers make a mistake, either as individuals or collectively as a community, they must pay the penalty. If a child puts its hand in the fire it will suffer pain. There is no escape; it cannot undo its rash action. So, too, the taxpayers cannot tear up and repudiate what they have done, or their Governments, acting for them and all too frequently upon their own urgings, and with the approval of the majority, have done for them. They must abide by the consequences.

What they can do, and should do, is set to work to remedy the mistakes made in the best way they can, and, sternly resolve not to commit the same mistake again. A little more thought and judgment before plunging into expenditures and debt is the surest method to reduce taxes and keep them down.

Where English Draw Line

An enterprising investigator has just discovered that the postoffice department of England will let you send a telegram calling a man a "chump" or a "blockhead," but it is against the rules to call him a "fathead."

Progress Of Silk Industry

So Far Economic Disturbance Does Not Seem To Have Affected This Business

The silk industry of Canada has so far evidently not been affected by any economic disturbance. In 1931 the value of production of this industry amounted to \$18,187,492, an increase of \$78,894 or 2.1 per cent. over 1930. There has been an increase in the Canadian silk industry from 1917 to 1931 of over 666 per cent in production, of 1,348 per cent in capital invested, and in the number of employees 561 per cent.

The silk industry of Canada is divided into two distinct branches, real silk and artificial silk. The industry is located entirely in the provinces of Quebec and Ontario, thirteen of the 23 establishments being in the former named province and ten in the latter. The principal items of production are broad silk or piece goods of real silk, of which 8,657,612 yards were made in 1931. Piece goods of artificial goods measured 4,073,434 yards; real silk mixtures measured 2,599,866 yards and 4,363,439 pounds of silk, artificial silk, yarns and threads and their mixtures were produced.

When We Slumber

Sleep Seems To Be Controlled By Amount Of Iodine In The Blood

A new idea of what sleep really is—discovery that it seems to be controlled by the amount of iodine in the blood—was reported to the British Association for the Advancement of Science.

Thyroxin, the iodine-containing secretion of the thyroid gland, apparently is the sleep-controlling substance, said Dr. G. S. Carter. It does its work in reverse fashion for artificial sleep-producing drugs, however. Sleep seems to come when the supply of thyroxin in the blood is decreased, not increased.

The winter-long "sleep" or hibernation that is habitual for many animals also seems to be controlled by thyroxin, Dr. Carter said his experiments showed.

He tried thyroxin on frogs, which have a different temperature and pulse rate in winter while hibernating than in summer when they are active. When thyroxin was added to the heart of the hibernating frog, its temperature and pulse increased to the summer level. Thyroxin was the only gland secretion that had this effect.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electrolytic Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an indispensable medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Prizes For Royal Ranch

Prince Of Wales Is Winner At C.P.R. Exhibition In Vancouver

His Royal Highness, the Prince of Wales, joined the ranks of the big winners at the Canada Pacific Exhibition in Vancouver.

Besides carrying off the grand championship bull and female awards, animals from the E.P. ranch at Pekisko, Alberta, won 21 other prizes in Shorthorn classes. The prizes were for varying ages.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves sprains, swellings and joint stiffness.

Warning Is Sounded In Connection With Mechanical Progress

Sir Alfred Ewing, president of the British Association for the Advancement of Science, sounded a note of warning to mechanical progress as he opened the 101st annual meeting of the association at York, England.

"We must admit that there is a sinister side even to the peaceful activities of those who in good faith and with the best intentions make it their business to adapt the resources of nature to the use and convenience of mankind," Sir Alfred said.

Telling of the great progress of the "mechanical age," Sir Alfred declared "man was ethically unprepared for so great a bounty. The command of nature has been put into his hands before he knows how to command himself." He declared that man had lost the joy of craftsmanship because of the machinery of mass production.

"In many cases unemployment is thrust upon the worker, an unemployment that is more saddening than any drudgery. And the world," continued the association president, "is itself glutted with competitive commodities, produced in a quantity too great to be absorbed, though every nation strives to secure at least a home market by erecting tariff walls."

Sir Alfred could not name a remedy for the situation but declared he refused to think that man is destined to atrophy and cease through cultivating what after all is one of his most God-like faculties, "the creative ingenuity of the engineer."

The president spoke with enthusiasm of the human and electrical communication which, he said, had brought distant parts of the earth's population into close contact and sympathy with one another.

Ferrian Balm Is Irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the skin. Makes hair soft-textured and youthful. Used by women as a powder base and as a perfume aid to lovely complexion. Used by men as an effective hair fixative or shaving lotion. And for children, tender soother and protects their tender skin like the delicately cool Ferrian Balm.

Decreasing Revenues

Quebec Reports Deficit For The First Time Since 1896

Decreasing revenues in Quebec were reflected in the annual financial statement of the province recently made public. A deficit of \$584,708.61 was reported, the first time since 1896 that Quebec has not wound up its financial year with a surplus.

The annual statement shows ordinary revenues of \$26,941,020.38 while expenditures amounted to \$27,525,728.97. The decrease in the revenue as compared with the previous year was \$4,589,600.20, compensated for partly by economies effected in various departments of \$5,912,824.33.

Don't Submit To Asthma. If you suffer without hope of breaking the chains which bind you do not put off another day the purchase of Dr. J. D. Kellogg's Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

Wanted To Be Friendly

But Attempt Proved Embarrassing For Service Club Member

It happened at a service club luncheon. The visitor was being introduced at the door. And the usual attempts were being made to make him feel at home.

"Say, haven't I met you before some time? Maybe in business. What's your line?" asked a club member.

"Well, maybe you have met me in business," said the visitor, somewhat haughtily. "I'm with a detective agency."

Then there was a general laugh, as the embarrassed member pushed his way through the crowd.

Mother—"Poor boy, how did you hurt your thumb?"

Son—"With a hammer, just a little while ago."

Mother—"But I didn't hear you cry."

Son—"I thought you were out."

DOES OWN HOUSE- WORK AT 70

With The Help Of Kruschen

"For nine years now I have used Kruschen Salt and I could not do without them. I take a third of a teaspoon in a cup of water as hot as I can drink. No sickness, no headaches now. I am 70 years of age in April, and just with taking Kruschen Salt am able to do all my housework duties myself. I recommend Kruschen to all my neighbors. Before I began taking it I was never away from the doctor, but now I never need him. I used to have sick headaches and then was not able to do anything. But now it is different—thanks to Kruschen Salt."—(Mrs. J. G.)

Kruschen keeps the organs of the body working actively, cleanses all clogging impurities from the system, and sends clear, vigorous blood coursing through the veins. And the result is an end to all minor ills and miseries. No more headaches, tiredness, depression, "nerves," or constipation. Instead a sensation of delightful freshness, high spirits, happy outlook—in short, sheer good health!

All Empire Soldiers Now Commemorated

Even Those With No Known Grave Named In Memorials

When the British war memorials were unveiled recently at Thiepval and Arras, France, by the Prince of Wales and Marshal of the Royal Air Force, Lord Trenchard, respectively, every empire soldier—officer and man—who was lost in the world war and never found was commemorated by name.

The Thiepval monument is carved with 73,867 names of men "with no known graves," while that at Arras records 35,000 names.

In 1904 the New Jersey legislature abolished slavery.

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower bow down to Canapar Cookery Parchment

BETTER, CHEAPER AND EASIER COOKING

Delicious as cauliflower, cabbage and certain other vegetables are, they have reputations for their cooking odors which fearlessly cooked them. Not to mention those who had to suffer the odor without enjoying the finished product. The same thing is equally true of fish.

Canapar Cookery Parchment, a very ingenious invention, does away with the cooking odors. While cooking, it also retains flavor and food value. Cooking in Canapar actually saves time. The French method of simmering and confining food and its flavor in a cloche.

You buy Canapar in a large envelope of handy-size sheets which may be rinsed out and used over and over again because they won't absorb odors. When boiling vegetables you simply wet the Canapar and make a bag similar to a pudding bag. If you steam them, you line the steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back. You can actually cook three vegetables at once in the same saucepan, this way—save fuel—and the flavors will not intermingle.

Steamed, or boiled, fish comes out firm, solid and swimming in its own juice. No odors. No sticky steamer or saucepan to clean up afterwards.

Line your roasting pan with Canapar, then the fats and juice can't burn. Meat is more succulent and there's no scorching or scraping of the pan afterwards.

Many women use Canapar for a dish cloth—it is so soft, and satisfactory, and doesn't absorb odors.

You'll never be without Canapar once you start using it. It saves time and money. Made by the famous PARASANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores sell Canapar. If you don't, just send the coupon and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd., Toronto, Ontario.

Enclosed find also for which please send me one full-size package of Canapar Cookery Parchment and four 100 recipes for "Leftovers."

National Advisory Council To Direct Co-ordination Of Agricultural Services In Canada

Domestic and provincial agricultural officials at Toronto concentrated on a study of the livestock industry to find ways of making it pay better dividends to the Canadian farmer.

The conference, called by Hon. Robert Weir, Federal Minister of Agriculture, also considered the establishment of a national advisory council to direct co-ordination of agricultural services throughout the Dominion. Such a council would co-operate with the national research council already in existence, explained Mr. Weir.

Samuel E. Todd, secretary of the Industrial Council of the Canadian Meat Packers' Association, told the 100 delegates that henceforth the packing houses of this country will permit government inspectors to inspect hog carcasses "on the rail" in the abattoirs. This practice will help Canada meet Danish competition in the United Kingdom market, it is expected. For some time Danish bacon producers have had the advantage of government inspection in the killing plant, while inspection in Canada has been made "on the hoof."

The job of agricultural officials and farmers, it was agreed, is to take full advantage of the 280,000,000 pounds bacon quota offered Canada by the United Kingdom, a quota much greater than the total annual production of Canada for 1931.

The conference also tackled the problem of marketing beef. Dean A. M. Shaw of the University of Saskatchewan, called attention to the market for finished beef in the United Kingdom, and pointed out that wheat is an ideal finishing feed for cattle. "There is just as much opportunity for the sale of comparatively poor quality cattle in certain markets as there is for the highly finished animal preferred in the big London stores," he added.

Dean Shaw declared continuity of supply was an even more important requirement than quality in the United Kingdom market, because dealers supplying the trade there could not afford to disappoint or lose their customers.

Irish Free State competition is a standard for the moment, said Dean Shaw, but he felt sure Irish cattle would come to the fore again sooner or later.

The conference set up a special committee to consider beef marketing, with the following members: Dean Shaw, Prof. J. C. Strechley, of the Ontario Agricultural College, Guelph; J. H. Evans, Deputy Minister of Agriculture for Manitoba; R. S. Hamer and P. E. Light, of the Dominion Livestock Branch, Ottawa. Hon. Robert Weir suggested that provincial agricultural form advisory committees of their own to discuss their own problems from an administrative standpoint and from the standpoint of extension. "They will also," he explained, "bring up in these committees questions of further research into the difficulties and problems affecting the progress of agriculture in that province."

In many cases, however, said Mr. Weir, other provinces might have identically the same problems. "Are they going to endeavor to solve them themselves or co-operate with other provincial and federal interests?" he asked. "There must be some one to whom they submit it to see if the problem is really provincial or national, also to ascertain what information in respect to it is already available. That is my idea of what this national advisory council should do."

A Perfect Driver

"My wife runs her new machine splendidly; never speeds so fast she can't stop within a foot or two; always pays attention to her wheel; never starts one way, and then without reason turns off in another direction; through her way around corners perfectly."

"What makes it the car?"

"Car? It's a sewing machine."

A salmon has been timed to swim 10 days in one second.

W. N. U. 1909

Doctors' Opinion On Alcohol As Medicine

Beneficial In Some Diseases But
Injurious In Others

Alcohol has been found beneficial in treating some diseases but injurious in others by Dr. Harold E. Himwich and Dr. Louis H. Nahum, of the Yale medical school.

Results of their study showing that alcohol increases the acidity of the blood to points formerly believed incompatible with life were made public at the international congress of the Federation of Societies for Experimental Biology held at New Haven, Conn.

In diseases such as tetany, where the blood contains an abnormal amount of alkaline substances, the scientists determined the acidosis of alcohol acts as a neutralizing agent.

Small doses of alcohol were found to be helpful in treating diabetes, for they counteract the effects of partially oxidized fatty acids.

On the other hand, the research showed administration of alcohol to pneumonia patients delays recovery by increasing acidosis.

The "hangover" following intoxication, they concluded is caused by the accumulation and persistence of lactic acid in the blood. This substance, which does not disappear as quickly as the alcohol, also is found after strenuous physical exercise and is believed responsible for a feeling of fatigue after hard work.

Advice To Agriculturists

Says Man On The Land Falls To
Grasp Best Methods Of Farming

Leading speakers before the national agricultural conference in Toronto, agreed that agricultural services should render more direct assistance to the Canadian farmer.

In a dozen committees efforts were being made to whip into shape definite recommendations in the Federal and provincial governments for co-ordination of governmental and other services. The indications were that every proposal would be debated by the conference as a whole.

Farmers are not doing "half as well as they know how," the conference was told by Dr. G. I. Christie, president of the Ontario Agricultural College. They fail to grasp the idea that there is a best method of farming, he said, but they need help so desperately that agricultural officials could find more effective means of giving them expert assistance.

(By Ruth Rogers)

BLOOMER DRESS EVER POPULAR WITH TINY MAIDS FOR PLAYTIME

She can't have too many! Isn't this a cute dress? The French yoke provides excellent theme for contrast. The skirt flares falling from the yoke, makes it swing about so prettily in motion. It can be made with tiny puffed sleeves as in miniature view.

So many materials would be suitable for to fashion it. It takes the minimum amount.

The one sketched in French blue with white dots in baliste. The yoke is plain blue with plain white ruffling. Style No. 854 is designed for sizes 2, 4 and 6 years.

Size 4 requires 2 1/2 yards 35-inch with 1/2 yard 35-inch contrasting. Pique, cotton broadcloth, linen, rayon novelties and wool crepe are sturdy and smart suggestions. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Damp and Tough Grain May Now Be Dried Without Damage To Its Milling and Baking Qualities

Canada need not again suffer the losses sustained when the percentage of tough and damp grain in the crops of 1925 to 1928 reached unprecedented heights ranging from 29.8 to 50.5 and the cash deductions to Canadian farmers totalled millions of dollars.

Artificial drying of wheat was one of the first problems to which the National Research Council's Associate Committee on Grain Research set its hand. In 1929 a report was issued which so set out the conditions of correct artificial drying that practically all causes of complaint against Canadian grain on the score of damage incurred during drying were removed. There has now been issued a comprehensive document of 104 printed pages, which confirms the specifications laid down in the first report, clears up a number of additional points and demonstrates what conditions contribute to the efficiency of commercial driers. Damp and tough grain may now be dried without damage to its milling and baking quality.

Included in the present report are discussions of a small-scale experimental drier designed for the study of the limits of safety in drying with regard to air flows, air temperatures and extent of drying in both continuous and batch drying of wheat. Other aspects of the problem discussed are factors in continuous drying, drying in cold weather, drying in two stages, drying with humidified air, excessive drying, inevitable loss in drying, atmospheric humidity in relation to grain drying, weight per bushel in relation to drying and the nature of injury caused by heat drying.

In three important appendices are discussions of observations made in commercial driers in Vancouver with suggestions for improved operation, a review of the literature on the bin drying of wheat (drying by natural ventilation; drying by forced, unheated air; drying by forced heated air and "sweating") and the influence of heat treatment on the baking behaviour of flour is determined by different baking formulas.

Copies of the appendix containing the review of the literature on the bin drying of wheat have been made available separately.

In making the investigations involved the committee developed a system of dividing all samples of grain tested into three or four parts and checking the milling and baking results independently in three or four laboratories, using methods which were carefully standardized by frequent consultation and comparison. It was considered important not to draw any far-reaching conclusions which might mean millions of dollars

one way or the other to the grain growers and the grain trade, without verifying results in more than one laboratory. The system inaugurated in this, the first large co-operative undertaking of the Associate Committee on Grain Research, has been followed in all later work, and has had the effect of inspiring confidence in published conclusions of the Committee.

The authors of the report now published are E. Stanfield, Chief Chemical Engineer of the Research Council of Alberta, and Dr. W. J. Cook, Junior Research Biologist, National Research Laboratories.

While it is believed that the two reports published cover most of the practical points which are likely to arise from the viewpoint of the operators of commercial driers, there remain some points of scientific interest which are being made the subject of fundamental studies. For example it will be of interest to know more about the nature of the changes occurring in wheat exposed to heat, as in the drying process, and what it is that under certain conditions leads to impairment of baking quality. These studies will be published in due course in the form of scientific papers and may easily help in unexpected ways in handling the practical problem of wheat drying to still better advantage. Dr. Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, comments: "It is impossible to assess in advance the value of fundamental research. All we know is that the more completely we understand any process, the more likely are we to be able to guide it to suit our own ends most effectively."

Nature Photography In British Columbia

Hunters Go After Big Game Loaded

With a camera. During mid-summer the organizing of hunting parties is carried on at many points in the Rockies, and by the first of September the trek of sportsmen to the best game haunts takes place. Splendid trophies may be secured of mountain sheep, goats, caribou, moose, bear and deer, but the modern hunter is becoming more and more an addict to the camera, either still or movie. Instead of returning with a load of heads, he contents himself with far more convincing records of his hunting prowess in the form of films. The camera hunter has the double satisfaction in knowing that the subject might have fallen an easy victim to his modern high-powered rifle, but still lives, free to enjoy life in his chosen haunts.

May Help Salmon Trade

Machine Invented To Skin The Fish Before Canning

Now even the salmon are getting skinned! An invention by W. F. Schlothman and his brother James, of Ketchikan, Alaska, skins salmon preparatory to canning them. Little information on the machine has been given out by the brothers pending patents. Some 20,000 cans of salmon have been cased so far this season with the new machine, and the inventive brothers see great things in their brainchild.

We've found a sure cure for insomnia. Instead of counting sheep, we just imagine that it's time to get up.

"They have met, but how can they embrace?" - Gesta Nostra, Duchastel.

Here is a complete photographic record of the great show put on by the two great celestial stars, Old Sol and Luna. Many astronomers who came from all parts of the world were denied a view like this owing to the presence of clouds. But our high-flying cameraman at Eyreburg, Mo., went above the cloudbank, into the very wings as it were. At the top left is a picture of the complete eclipse, while various phases are shown in the rest of the picture. The picture at the lower left shows President Hoover as he watched the phenomenon from the portico of the White House. The picture at lower right is an interesting shot, made during totality. It shows the top of the cloudbank illuminated by the light from the corona. The earth was in darkness then.

For Baby's Bath

More than that of any other member of the family, baby's tender, delicate skin needs the greatest care and attention. Baby's Own Soap make it specially suitable for babies, and its clinging fragrance reminds one of the roses of France which help to inspire it.

"It's best for you and Baby too"

WORLD HAPPENINGS BRIEFLY TOLD

Construction of a Canadian legation building in Tokyo has been suggested to the Dominion government, but no decision has been reached.

Hugo Bilgram, 85, pioneer mechanical engineer, inventor, manufacturer, economist and oldest member of the Franklin Institute, is dead. He invented the bevel gear generating process.

Sir William Grenfell, medical missionary to Labrador, believes Newfoundland should under no circumstances dispose of her Labrador territory.

A total of 124 wartime ships tied up at various ports of the United States have been ordered withdrawn from registry by the Shipping board paratory to scrapping them.

Rumors that Japan was increasing her naval strength at Shanghai, as circulated in Chinese newspapers, brought a sweeping denial from the Japanese consulate.

The Aero Club of France has recognized Maryse Hiltz as the maker of a new altitude record for women. August 19 she rose to a height of 31,000 feet.

Up to the end of July importations of United States anthracite for the seven months of the calendar year had declined 50 per cent. compared with the corresponding period last year.

Intimation that a new trade agreement between Canada and Belgium is being considered by both countries was given at Quebec, by J. Van Rieckst, consul general for Belgium at Vancouver.

The Transient Problem

Fear Expressed That It May Produce a New Criminal Class

If the movement of unemployed transients from place to place is allowed to continue it will produce a new criminal class from which Canada has hitherto been practically free. This is one of the findings of the committee of the Canadian Bar Association on the administration of criminal justice, and forms part of the committee report.

To cope with the transient problem the committee recommends active enforcement of the vagrancy sections and other portions of the criminal code "which seem to have been held in abeyance."

Legislation which would impose on every community responsibility for the maintenance of indigents produced in that community, should be passed without delay, the committee urges.

Despite prevalence of conditions which might be expected to lead to crime there was no marked increase in criminality in Canada, during the past year, the committee finds, Canadians had remained law-abiding.

A hen-pecked man was informed that a Bengal tiger had escaped from a menagerie, and was chasing his mother-in-law.

"Why should I worry about what happens to a Bengal tiger," he answered.

World Court Is Fair

Smallest Nation Always Sure Of Getting Square Deal

The theory of the World Court and the League of Nations is that each nation has an equal say in the affairs, and equally certain of a square deal in any controversy. This was exemplified by the decision of the World Court handed down recently in a dispute between the small republic of Lithuania, and the mighty powers of Great Britain, France, Italy and Japan.

On the main point, which had to do with whether Lithuania had the power to sack a particular state official, the Court decided in favor of the republic.

It is a good thing that the international tribunals get a chance to show their impartiality sometimes, because it is a lesson to the world at large, and an assurance to the small nations that their interests are properly taken care of and no favors shown to the big fellows.—St. Thomas Times-Journal.

Fashion

(By Ruth Rogers)

EVERY WOMAN FEELS SHE SHOULD HAVE A WOOLEN JACKET DRESS FOR FALL AND WINTER

Here's a beauty. The jacket-like blouse can be made in either of two ways. In the large sketch, the revers neckline, which is so generally becoming and popular is just as smart as can be. The miniature view shows it in a more severe collarless type that emphasizes the buttoned closing.

The skirt is attached to a camisole top. Inverted plait at either side of the front, provides ample fullness. A rum-brown tweed mixture made the original. You'll be delighted with the small coat.

It's so simple to fashion. Wool crepe, soft monotone woollen and rough crepe silk are also suitable. Style No. 840 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 2½ yards 54-inch, with ¾ yard 35-inch for camisole and 1½ yards 38-inch lining. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

End Lonely Vigil

Four Soviet Scientists Return From Bleak Arctic Wastes

Four Soviet scientists have ended a lonely two-year vigil in the bleak Arctic wastes of Northernland, during which their only contact with civilization was by radio. They have been relieved by four other observers, one of them a woman.

A brief wireless despatch from the icebreaker "Bibikov," now engaged in Arctic exploration, reports that the party of four, headed by the geographer, Ushakov, were taken aboard after the relief party, sent out aboard the icebreaker, had taken over.

The woman member of the replacement party is Tri Ruznaya, who although she is only 30, is a veteran of polar expeditionary work. With three male colleagues she will spend the next two years at the four outposts, where only human inhabitants will continue their explorations and mapping of Northernland.

The four men who are returning were reported to be in excellent health despite the difficulties of their assignment.

Air Transportation

U.S. Pilot Congratulates Canada On Part Played In Establishing Civil Aviation

Air transportation and radio communication will play a great part in carrying out the policies agreed upon at the Ottawa Imperial Conference, according to William F. MacCracken, Jr., of Washington, D.C. He urged Canada to promote aviation to its utmost.

Speaking before a service club meeting in Calgary, Mr. MacCracken, who is honorary secretary of the American Bar Association, declared aviation and radio would play an important part in world affairs.

Mr. MacCracken is a pilot of distinction and was in Calgary attending the annual convention of the Canadian Bar Association. He paid tribute to the Canadian government in establishing civil aviation and to the aid which Canada rendered the United States when it started organizing civil aviation six years ago.

Ralph: "Before Amos was married he said he would be the boss or know the reason why?"

Chester: "And now?"

Ralph: "He knows the reason why."

DELEGATES RETURN TO BRITAIN

The last of the United Kingdom delegation to the Ottawa Conference returned to England on the Cunard Liner "Aurania" from Montreal. The party were headed by (left) R. B. Howarth, C.B., C.M.G., secretary of the United Kingdom delegation; Sir C. J. Howell-Thomas, K.C.B., C.M.G., head of the British Department of Agriculture; V. H. Boyse, M.B.E., Cunard Photo.

SUNDAY SCHOOL LESSON

SEPTEMBER 18

THE REPORT OF THE SPIES

Golden Text: "Jehovah is the strength of my life; of whom shall I be afraid?"—Psalm 121:1.

Lesson: Numbers 13:1 to 14:45.

Devotional Reading: Psalm 95:1-7.

Explanations and Comments

Twelve Spies Sent To Canaan, verses 1-20.—When encampment was made at Kadesh-Barnea, near the border of the Promised Land, Moses sent twelve spies over the border to ascertain the nature of the land, whether good or bad, whether wooded or not, and to gain information about the inhabitants, whether they were numerous or not, whether strong or weak, and also facts about how they lived, whether in cities, camps, or strongholds. He also directed them to bring back specimens of the fruit they found.

"The land was ready for the people, but were the people ready for the land? The report which Caleb and his company was to bring was to decide, not a question of geography, but a question of philosophy." It was to test the capacity of the people of God, to determine whether the heart of Israel was ripe for its inheritance.—Caleb's Message.

The Journey Of The Spies, verses 21-25.—The spies proceeded to Hebron and into the Valley of Eschol. They cut down a branch with a single cluster of grapes so heavy that two men carried it on a staff between them. Eschol means a cluster; it received its name from this incident, the writer of Numbers tells us. The spies also brought back pomegranates and figs.

The Majority and Minority Reports, verses 26-33.—On their return to Kadesh, the spies reported to Moses and Aaron and all the congregation. They showed the fruit they had brought back and declared the land to be exceedingly fertile, for that is the meaning of the expression "it floweth with milk and honey." Honey was of great importance to the Israelites, for it took the place of our sugar. "However" (Nevertheless), the spies hastened to add, for they were far more inclined to dwell upon the difficulties in the way than upon the attractiveness of the land, the people that dwell in the land are strong; and the cities are fortified, and very great; and, moreover, we saw the children of Anak (giants) there.

What a difference it would make if all the butts of life could be changed to ands! The cities were great, and yet God was greater, the giants were strong, and yet God was stronger.

The Perfect Dinner

When the Prince of Wales attended the recent medical conference banquet at Albert Hall, London, England, he ate what world experts in dietetics chose as the perfect dinner. Of course, he said he enjoyed it. It consisted of mellow, soup, boiled salmon, mutton, quail, with salad and an ice.

"DO I DREAD MY NEXT BIRTHDAY?"

NO!" says Anita Stewart

says Anita Stewart, charming screen star. "I'm often asked if I dread my next birthday. I'm glad to say I don't. Nowadays it's possible for a woman to grow even more charming as the years go by. No one needs to look old who is willing to take regular, sensible care of her complexion."

Anita Stewart is only one of countless lovely actresses who use Lux Toilet Soap. In Hollywood, actually nine out of ten stars guard their complexions with this fragrant white soap. It has been made official for dressing rooms in all the great film studios. Buy several cakes today to care for your skin—at only 10¢ a cake!

Appetizing Salads

This Healthful Addition To Menu Had Beginning In Early Roman Days

The very appetizing—one could almost say "beautiful"—salads which are served today had their beginning in early Roman days when green uncooked vegetables were eaten with salt sprinkled over them. Cream was brought to Rome from Persia and eaten with bread, and celery was raised by the Romans because its delicate green looked well in garlands! The ancestor of our modern lettuce and endive grew wild on the banks of the Mediterranean in ancient times.

Salads fell into disfavor for a time and many people, chiefly masculine, spoke slightly of salads as "rabbit fodder." There is nothing difficult about the preparation of a salad which has "appetite appeal." A salad, to be at its best should have a flavorful dressing, carefully blended with the other ingredients and should be as cool and crisp as possible. Care should be taken to arrange the salad daintily and garnish it attractively. Salad may be prepared in the morning and kept in the refrigerator.

Fish or meat salads are nourishing for the main course, a fruit salad may be served in place of dessert and a vegetable salad is both healthful and appetizing in place of hot vegetables.

Most important of all is the salad dressing. While there are other types of dressing, two of the most popular are mayonnaise and boiled dressing. These two recipes can be made with evaporated milk which gives them a rich smoothness and body. The Eggless Mayonnaise given is widely used because egg yolks are not needed.

EGGLESS MAYONNAISE

- ½ teaspoon salt.
- ½ teaspoon dry mustard.
- ¾ teaspoon paprika.
- ½ teaspoon granulated sugar.
- Four grains cayenne.
- 3 tablespoons evaporated milk.
- ½ cup salad oil.
- 2 tablespoons vinegar or 1 tablespoon lemon juice.

Thoroughly mix dry ingredients. Add evaporated milk and blend thoroughly. Beat in salad oil gradually. Add vinegar, or vinegar and lemon juice, beating until mixture is smooth. Makes one cup.

DR. HAMILTON'S PILLS

STOP HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

UNION CABINET PLAN MAY SOLVE B. C. DIFFICULTIES

Victoria, B.C.—Premier Talmie of British Columbia stepped out upon the traditionally treacherous ice of "union government" with the supporters of such a move confident that the footing has been made more secure by the rigid exigencies of the times, and with the confident march of the National Government in England to assure them.

The premier said he would shortly issue a statement which will include a clause favoring the establishment of a union government composed of "men, who, regardless of other considerations, appear to be able to render the best service to the state," and "along the lines of the National Government in England," as the best method of meeting present conditions.

The announcement is the first break in the hazy atmosphere of political rumor that has enveloped the province for many months. Those who have stood undecided as to what would happen and what they would do when it did happen, must soon declare themselves, and the electorate will presumably have an early chance to say whether they have done well.

Though events may be expected to move rapidly, and little time will probably be necessary to clarify the situation. It is not thought that Premier Talmie's plans are clear-cut as yet. He is conferring with W. J. Bowser, K.C., former Conservative premier, who is regarded as playing an important role in the situation.

In all probability the premier will go ahead with his plans regardless of who joins or who stays out. In the ordinary course of events the legislature would be called together, the new government's programme presented, and an appeal made to the people on it.

Every possible combination of public men has been suggested as the likely members of the new government, but beyond the presumption that certain members of the present government will go out, and certain Liberals will come in, forecast is futile.

Men Return To Work

C.P.R. Shop Departments, Winnipeg, Operating On Short Time

Winnipeg, Man.—Nearly 1,200 employees of the Canadian Pacific Railway's locomotive department here, returned for 12 days' work in September, in addition to the 700 men of the car department who were taken on again on September 1 to work for 21 days, according to an announcement of the company.

All men will continue to be employed on the basis of a 40-hour week and no extra help will be taken on, the announcement.

The employees of the car department worked 22 days in August, a considerable increase over the previous month, made possible by the necessity of preparing additional grain cars to take care of the large grain crop expected this year.

Had Perilous Ride

Meeteetse, Wyo.—Unknown to Pilot Bill Monday, Young Jerry O'Leary grabbed the tail of Monday's plane and rode aloft 1,000 feet, hanging on grimly as the ship wavered with its rear-end weight. When the pilot found out what was wrong he landed without injuring O'Leary.

Manitoba Aviators Safe

Cormorant Lake, Man.—Flying Officer R. A. Gordon and Aircraftsman John Forney arrived here after a record-breaking flight to 21,000 feet in the air carrying scientific instruments designed to reveal facts in connection with the cosmic ray.

Tariff Helps Canada

Ottawa, Ont.—Considerable benefit to Canadian trade with Australia is seen in the tariff amendments introduced in the commonwealth budget according to the Canadian trade commissioner at Melbourne, D. H. Ross.

W. N. U. 1909

Study British Markets

To Take Advantage Of Trade Agreements Reached At Conference

Ottawa, Ont.—At the coming session, parliament will likely be asked to take steps to enable Canada to better participate in the advantages offered by the trade agreements entered into at the Imperial Economic Conference. A careful study of the markets in the United Kingdom is being made by the Department of Agriculture in Ottawa. A campaign for increased hog production is one of the projects under consideration.

One of the surpluses has been the low prices for live cattle in the United Kingdom. Canada shipped no cattle to Britain last week and up to the present the department has received no information of any being shipped this week. The chief reason is that Canadian domestic prices have advanced above United Kingdom prices when shipping costs are taken into consideration.

Despite the 20 per cent. duty on Irish cattle, beef prices in Britain are low. Bacon is exceedingly cheap in Britain just now and in great abundance so that its consumption has materially increased. Lamb and mutton are also in great abundance.

A heavy movement of western cattle to the Ontario farms this fall is expected. The live cattle market is always the best in Britain in the spring and with so great an abundance of feed in Ontario this year, plans are being made to buy western cattle, fatten them during the winter and have them ready for export in the spring.

Relief For Veterans To Be Equalized

Will Be On Same Basis As For Others

Ottawa, Ont.—Relief to war pensioners, where less than granted to civilians by municipalities, will be placed on the same relief basis as that granted by the municipalities, the department of pensions and national health announces, in confirmation of the principle announced at Calgary by the Prime Minister.

Mr. Bennett was quoted as having said that the unemployed veterans would have their pensions increased to conform with the relief rate paid by municipalities. This, the department officials explained, was technically incorrect. Not the pension rate but the relief rate would be raised, they said.

Veterans, receiving small pensions, were barred from receipt of relief and received less than other unemployed. The attention of Premier Bennett was drawn to the situation by a resolution sent him by the Winnipeg Legion command.

Woollen Mill Project

Scott Firm May Establish Mill In Calgary

Calgary, Alberta.—Dr. A. Oliver, owner of two idle woollen mills at Galaahall, Scotland, has offered to dismantle one and establish it in Calgary. Alderman R. H. Weir told members of a Calgary service club. If plans are successfully completed, Alderman Weir said, the mill would employ 700 men. He intimated, however, plans were still in an early stage.

A Lasting Agreement

Calgary, Alta.—Agreements made between various dominions and the United Kingdom at the Imperial Economic Conference at Ottawa were as complete as could be arranged and probably will continue long after their agreed time limit expires. Sir Philip Cunliffe-Lister told reporters on his arrival from the Pacific Coast.

Not So Many Failures

New York.—What is described as an "astounding drop" in business failures is reported by Bradstreet's Weekly, covering the final week of August. Failures declined from 327 the preceding week to 425 for the week ended September 1. It was the smallest total for any week since November, 1931.

David Owen, of Chwilog, Wales, has completed 80 years' attendance at the Welsh Sunday School.

POPULAR REAR ADMIRAL

It is understood that Rear Admiral Evans, "Evans of the Broke" fame, is to succeed Vice Admiral H. J. Tweed as Commander-in-Chief of the African Station of the British Navy. The popular Rear Admiral is pictured above.

Beauharnois Project

Plans Approved For Expenditure Of Fifty Million Dollars

Ottawa, Ont.—Plans for the general works of the \$50,000,000 Beauharnois project have been approved by the Dominion Government. Official announcement to this effect was made recently.

The plans given the stamp of approval include the 14-mile Beauharnois canal between Lake St. Louis and Lake St. Francis, near Montreal, which will shortly be conveyed by the company to the Dominion.

Passing of the order-in-council sanctioning the plans removes any obstacle in the way of the Beauharnois concern fulfilling its contract with the Ontario Hydro commission on October 1. According to the terms of this contract the company will make 35,000 horse-power available on that date for the use of the commission. This amount is to be increased gradually until a total of 250,000 horse-power is placed at the disposal of the Hydro authorities at the end of five years.

Signing of the agreement by the Dominion and the company for the transfer of the canal to Canada is expected to take place shortly.

Population Of Vancouver

Greater Vancouver Population Now Given As 308,340

Ottawa, Ont.—Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 308,340. It is reported by the Dominion Bureau of Statistics. The distribution by locations is: Burnaby district municipality, 25,564; New Westminster city, 17,524; North Vancouver district municipality, 4,785; West Vancouver district municipality, 4,784; University endowment area, 575; Vancouver city, 246,583.

UNITED STATES AMBASSADOR TO CANADA RESIGNS

It is with regret that Canadians learn of the resignation of Col. MacNider, United States Ambassador to the Dominions, who will return to Washington. Col. and Mrs. MacNider have become very popular at the Canadian Capital. The Ambassador is pictured above (left) with a close-up of Mrs. MacNider.

Evils Of Waste

Lord Beesborough Refers To Economic Troubles Of The World

Vancouver, B.C.—Evil of waste—waste of substance, of opportunity, and most important of all, waste of energy and human effort through lack of co-ordination—that, in the opinion of Lord Beesborough, governor-general of Canada, is the worst of all evils from which the world is suffering.

So he expressed himself in an address here recently before a gathering of city service clubs.

"It is a very fashionable amusement nowadays to try to diagnose maladies from which the world is suffering. Nearly all of us fancy ourselves world doctors and like to think we could put things right if we were allowed to administer our own particular economic pill, our own financial tonic," said his excellency.

"Though we may differ about the right cure, though we are by no means unanimous about symptoms, there is one general principle on which I think we are agreed—that is: One of the worst evils we have to overcome is waste."

Loading Wheat At Churchill

Fifth Ship Arrives At Northern Port To Load Cargo For Canada

Churchill, Man.—After battling gales, fog, and ice in the North Atlantic and Hudson Strait for a week the S.S. Grethelund of London arrived September 7th, and 20 minutes later was loading 264,000 bushels of wheat for Cardiff.

"The Grethelund" is the fifth ship to load grain here this year. She expects to discharge her cargo in Cardiff in two weeks.

Capt. Thomas Griffiths, of the Hinton Lines, said he was bothered somewhat by ice in the strait. This ship does not carry a gyro compass. Officers said such a compass was necessary in Hudson Bay. The M. H. Lady Logan, carrying a party of government geologists of Ottawa who have been working in Chesterfield, is reported off Cape Eskimo, en route here.

Western Wheat Production

Estimate For This Year Places Crop At 420,813,000 Bushels

Winnipeg, Man.—The wheat fields of western Canada will produce 426,813,000 bushels of wheat this year, according to the annual estimate of grain crops compiled by the Winnipeg Free Press. Saskatchewan's production is placed at 217,602,000 bushels, Alberta's at 168,120,500 bushels, and Manitoba's at 41,090,500.

Although the Saskatchewan wheat acreage is the largest of the three, the estimated average yield in that province is lower than in the others. It is placed at 14 bushels to the acre.

Estimates on coarse grain crops place the oat yield in the three provinces at 257,191,000 bushels; barley at 66,445,800 bushels; rye at 9,575,800 bushels, and flax at 3,165,500 bushels.

TO INVESTIGATE SHORTAGES IN COLLEGE FUNDS

Winnipeg, Man.—Investigation by a judicial committee of facts surrounding shortages in University of Manitoba endowment funds was unofficially promised by Hon. R. A. Hoey, Minister of Education and acting premier. Mr. Hoey also stated he would recommend restoration of university funds.

"The government will undoubtedly make restitution of the funds at some time in the future," Mr. Hoey said, "but they cannot, of course, do so until after the matter has been thoroughly threshed out in the courts and by a judicial commission, if, as I understand it, it is the intention of the government to appoint such a commission to fix the ultimate responsibility for the losses."

"The matter is purely one of government policy," Mr. Hoey continued. "It is not a question for decision by any one member of the cabinet. It must await the decision of the cabinet as a whole."

The inquiry in connection with the university monies will have no bearing on the similar position of the Anglican church. This will be dealt with by church authorities. Rev. Canon S. Gould, Toronto, general secretary of the missionary society of the Church of England in Canada, held a conference with His Grace Archbishop I. O. Stringer of the diocese of Rupert's Land. He will also spend some time in the west discussing the western church crisis with heads of the missionary dioceses.

Commissioner Of Excise

Toronto Investment Banker To Succeed G. W. Taylor, Who Has Resigned

Ottawa, Ont.—Hugh D. Scully, investment banker, Toronto, will be appointed Dominion commissioner of excise. He will succeed G. W. Taylor, who has resigned.

Mr. Scully will bring to his new duties a wide experience in finance and business. For some time he has been associated with the Canadian Manufacturers' Association, occupying the position of assistant secretary in that organization. He was also active in connection with the automotive industry, and since 1922 has been a member of the firm of Stewart, Scully, Company, investment bankers.

Mr. Taylor retires from the post of commissioner of excise on October 1.

Manchester Cotton Strike

Employers Have Expressed a Willingness To Arbitrate

Manchester, England.—A "ray" of hope appeared in the Lancashire weavers' situation when employers expressed a willingness to arbitrate.

During the meeting, lasting half an hour, the Cotton Spinners and Manufacturers Association central committee drafted its reply to the offer of Sir Henry Betterton, Minister of Labor, to sponsor a meeting with union leaders. The association said it would attend such a meeting, if invited.

A union representative commented that the action was a surprise and the employers had gone further toward settlement of the issues than was expected.

Fellow Veterans Retirees

Ottawa, Ont.—Headquarters of the Royal Canadian Mounted Police announced the retirement of Inspector Robert Humby after a long period of service. Inspector Humby served most of his time in Western Canada, and was lately stationed at Prince Albert, Sask. He had been inspector since 1914.

Leaders To Visit London

Simla, India.—Native leaders of British India are to visit London once again and, with the king-emperor's ministers, attempt to complete a settlement of their country's political future.

What Have You Learned in the New University?

Talk with almost any woman and you will find her amazingly informed on vitamins, balanced diets, refrigeration, labor saving, family hygiene. Watch her during the day and you will find her employing this new knowledge for the improvement of living.

Talk with almost any man and you'll find him technically informed about motor cars, machines, radios, telephones—materials, designs, uses, in a dozen fields.

What has happened? It seems that people know more than they used to, and that they use their newly-found knowledge to their comfort and happiness.

Possibly this is the explanation: There is today a New University—the University of Advertising: its doors never close, it's open to all, and the fee of admission is the price of a newspaper. The subjects taught are ways to make life better and more enjoyable.

When Mental Growth Stops.

The beginning of a new year in the whole system of public education, the trooping of the thousands of boys and girls to the schools, has caused some elders to do some thinking about education. An insatiable appetite for knowledge is a normal heritage of every human being. The great and exceptional human beings retain their intellectual curiosity as life carries them on through childhood and youth to maturity. Most of us, as children, are rebuked or discouraged by explanations that do not explain, and so our eagerness to know soon becomes blunted and our eyes blinded to the mystery of the world. Too often the process known as "education" adds to that blunting and blinding. It sometimes creates the false belief that it is possible to know all about anything. Real education never stops while we are still alive. Mental growth stops when intellectual curiosity ceases.

Auto Accident Every 40 Mins

According to records of the motor vehicles branch of Ontario Dept. of Highways, motor vehicle accidents in Aug. 1931, averaged over 33 per day; of these 77 were fatalities and 1025 persons injured. The figures are for Ontario alone, and not for the whole country, as one might imagine from the size of the figures.

The causes of the accidents recorded were various; but it is noteworthy that more than one fourth of the motorists involved came to grief while driving on the wrong side of the road, and almost as many were driving too fast for traffic and road conditions.

Holborn Happenings.

An exciting and eventful day took place here last Saturday. It was reported thru the district that a prairie fire was doing considerable damage near the river, and that the fire brigade from Edmonton, under a Marshal, were coming out. Someone noticed Sydney rushing with bronchos and wagon at a breakneck speed southward shortly after the summons was given. As the Marshal and his fire crew were delayed, Holborn Fire Brigade successfully took its place, and the fire checked without further damage.

The Jr. U. F. A. held their meeting on Saturday night, Sept. 10.

Threshing machines are heard busily humming everywhere. Magnus Larson and Ez Lory, two young sports from Stony Plain, are helping to operate one of the Holborn rigs.

The Carrier Wave for Higher K. C. Frequencies.

Observations which may have an important bearing on broadcasting of the future, were made during the recent eclipse of the sun by a company of Canadian scientists led by H. J. Vennes, head of the radio laboratory of the Northern Electric Co. in Montreal, in collaboration with the National Research Council of Canada, with Dr. A. S. Eve of the faculty of McGill University, as chairman of the Committee on Radio Research.

Theories concerning the effect of the Kennelly-Higginson layer which is believed to dangle in a constant state of sinusoidal movement like a cobweb in the wind some 60 miles above the earth acting as a reflecting ceiling for radio waves and so enables them to go round the earth, and yet at the same time causes fading and "skip distance" were put to the test during the eclipse. Tests were made to establish a working basis and to adjust the delicate apparatus which had been set up in the copper-lined room in the laboratory of the Shearer St. plant of the company. A special loop antenna set up on the roof of the building caught the test waves from station CNRO, which this station was transmitting on a wave frequency of 600 KC, the carrier wave being the important part of the broadcast.

The record of the strength of this wave recorded graphically on a strip of paper when compared with time, taking the totality of the eclipse as the pivotal point, enabled these scientists to determine whether or not it was the Corpuscular eclipse, taking place about 2 hours previous to the Visual eclipse, and which is caused by neutral particles which travel at a faster rate of speed than do the ultra violet rays, or whether it was the Visual eclipse and, therefore the ultra violet rays which are the cause.

Short wave behavior was also observed during the test. It had been thought that the Ultra Short and Shorter Commercial and Amateur wave lengths (represented by higher KC frequencies) pass thru the lower layer 60 miles above the earth. Thus by the geometric principle are guided to a point which is much more distant than if they had been reflected like broadcast waves from the lower level.

The eclipse gave the scientists a unique opportunity to put these and other theories to the test.

Decide Golf Prize On Roof of World

THE Prince of Wales Trophy, one of goldsmith's most coveted possessions, has just been decided on the spectacular links of the Banff Springs Golf Course, a mile above sea level, in the heart of the Canadian Rockies. This year the trophy went overseas to an Englishman, down from Oxford University, a newcomer to the ranks of champions who made the long trip a week ahead of play. He is W. A. Sime, Bedfordshire Golf Club, Bedford, England, who is seen shaking hands, with the runner-up, Gordon MacWilliams, Bowness Golf Club, Calgary, one time Alberta champion. Mr. Sime won the final, four up and three to play, and the

game was refereed by "Bill" Thompson, genial pro of the Banff course, who is seen standing between the pair. A large gallery followed the play. The Brewster Cup championship was decided at the same time over the Banff Springs course. It was a woman's championship and was taken by Mrs. G. F. Dewolf (right in photograph) of Vernon, B.C., who defeated Miss Jean McMillan, of Calgary, Alta., in a close fight that was only decided on the 18th hole by one up. Lay-out shows the two champions being congratulated by their opponents; and the Prince of Wales Cup with the Banff Springs Hotel in the background.

MARGARET FIEDLER

Author of
"The Splendid Folly," "The Herald of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXI.—Continued.

A brief silence followed this announcement. Blaise was thinking contentedly. So Madame de Varigny, despite her French name and her French mannerisms, was an Italian! He might have guessed it had the possibility ever definitely presented itself to him—guessed, it from those broad, high cheek bones, those liquid, southern-dark eyes, and the coarse, blue-black hair. Yet, except for one fleeting moment at Montavon, the idea had never occurred to him, and it had then been swiftly dispelled by Jean's explanation that the impressive-looking Cleopatra was the Comtesse de Varigny and her chaplain for the time being.

Italian! Blaise felt more convinced than ever now that Madame de Varigny's visit portended unpleasant developments. Something, a voice from the past, was about to break stridently on the peaceful present. He braced himself to meet the encounter whatever might be coming. Vaguely he foresaw some kind of blackmail, and he thanked Heaven for Jean's absolute understanding and complete knowledge of the past and of all that appertained to his first unhappy marriage. There would be little foothold here for an attempt at blackmail, however skillfully worked, he reflected grimly.

He therefore responded civilly to Madame de Varigny's statement, apparently accepting it at its mere face value.

"Am surprised," he told her. "You have altogether the air of a Parisian." The Countess smiled.

"Oh, I had a French grandmother," she returned carelessly. "Also, I have lived much in Paris."

"Ah! that explains it," replied Tormarin, leaning back in his chair as though satisfied. "It's the influence of environment and heredity, I expect."

He was fencing carefully, waiting for the woman to show her hand.

"I have also Corsican blood in my veins," pursued Madame de Varigny. Then, as Tormarin made no answer, she leaned forward and said intently: "Do you know the characteristic of the Corsicans, Monsieur Tormarin?"

They never forget—neither—their foreign accent increasing, as usual, with emotion of any kind. "The Corsicans always repay."

"Yes? And you have something to repay? Is that it?"

"Yes, I have something to repay." "A revenge, in fact?"

She shook her head.

"No, I do not call it revenge. It is punishment—the just punishment

earned by the man who married Nesta Freyne and brought her in return nothing but misery."

Tormarin rose abruptly.

"What have the affairs of Nesta Freyne to do with you?" he asked sternly. "As you are obviously aware, she was my wife. And I do not propose to discuss private personal matters with an entire stranger."

He moved towards the door. "I think our interview can very well terminate at that. I do not wish to forget that I am your host."

"You are more than that," said Madame de Varigny suavely. "You are my brother-in-law."

"What?" Tormarin swung round and faced her.

"Yes." The suavity was gone now, replaced by a curious deadly precision of utterance, enhanced by the foreign rendering of syllable value, "I am—or was, until my marriage—Margherita Valdi. I am Nesta's sister."

Tormarin regarded her steadily.

"In that case," he said, "I will hear what you have to say. Though I don't think," he added, "that any good can come of raking up the past. It is better forgotten."

"Forgotten?" Madame de Varigny seized upon the unlucky word. "Yes—it may be easy enough for you to forget who you look Nesta's young, beautiful life and crushed it, who came like a thief and stole from me the one creature in the whole world whom I love—my bambino, my little sister. Oh, yes—her voice rose passionately—"easy enough when there is no one who looks like her—with whom you think to start your life all over again! But I tell you, you shall not! There shall be no new beginning for you—no marriage with this Jean Peterson to whom you are now fiancée. I forbid it!"

Blaise stemmed the torrent of her speech with an authoritative gesture.

"May I ask how the news of my engagement reached you?" he asked, his cool, dispassionate question falling like a hailstone dropped into some molten stream of lava.

"Oh, I have kept watch. I have the means of knowing. There is very little that has happened to you since—since I wrote to you of Nesta's death—she stumbled a little over the words, and Blaise, despite his anger, was conscious of a sudden flash of sympathy for her—very little that I have not known. And this—your engagement, I knew of that when it was barely a week old."

"I'm really curious to know why my affairs should be of such surpassing interest to you. My engagement, in instance—how did you hear of it?"

"Oh, that was easy"—contemptuously. "There was another man who loved your Miss Peterson—this Monsieur Burke. I used him. I knew he was afraid that you might win her, and I told him that if ever you became engaged he must come and tell me, and I would show him how to make sure that you should never marry her. Oh! That was very simple."

"I'm afraid you promised more than you can hope to perform. I grant that you have every reason to dislike me—hate me, if you will. I acknowledge, too, that I was to blame, miserably to blame, for Nesta's unhappiness—as much in fault as she herself. But there is nothing gained at this late hour by apportioning the blame. We each made bad mistakes—and we have each had to pay the price."

"Yours has been a very high price—compensatively," she commented with intense bitterness.

"Do you think so?"

Something in the quiet, still utterance of the brief question brought her glance swiftly, curiously, back to his face. It was as though, behind those four short words, she could feel the intolerable pressure of years of endurance. For a moment she seemed to waver, then, as though she had de-

liberately pushed the impression aside, she laughed disagreeably.

"Too light to satisfy her sister, at any rate."

Tormarin froze.

"It is fortunate, then, that my ultimate fate does not lie in your hands," he observed.

"But that is just where it does lie—in the palm of my hand—there!" She flung out one shapely hand, palm upward, and pointed to it, with the other.

"And now—see—I close my hand—sol . . . Oh, yes! And this beautiful marriage of which you have dreamed, your marriage with Miss Peterson—it does not take place!"

"Are you mad?" asked Blaise contemptuously, expending all an Englishman's distaste for this display of unforced drama.

She shook her head.

"No," she said quietly. "I am not mad."

The air of theatrically seemed to fall suddenly away from her, leaving her a stern and sombre figure, invested with an intrinsic atmosphere of tragedy, filled with one sentiment only—the thirst for vengeance.

"No, I am not mad. I am telling you the truth. You can never marry Jean Peterson, because Nesta—your wife—still lives."

Tormarin felt back a pace. For one moment he believed the woman had gone genuinely mad—that by dint of long brooding upon how she might most hurt and punish the Englishman whom she had never forgiven for marrying her sister, she had evolved from a half-crazed mind the belief that Nesta still lived and that thus she would be able to prevent his marriage with any other woman.

And then, looking into those seeming soft brown eyes with the granite hardness in their depths, he could see the light of reason burning steadily within them.

Madame de Varigny was quite sane, as sane as he was himself. And if so . . .

A great fear came upon him—the fear of a man who dimly senses the approach of some appalling danger and knows that it will find him utterly defenceless.

"Do you know what you are saying?" he demanded, his voice roughened and uneven.

"Yes, I know. Nesta is alive," she repeated simply.

"Alive?"

The word was wrung from him, hardly more than a hoarse whisper of sound. He swung round upon her violently.

"But you yourself would and told me of her death?" She nodded placidly.

"Do you think so?"

"Yes, I wrote a lie."

"But the official information? We had that, too, later, from the French police, confirming your account. You had better be careful about what you are telling me," he added sternly.

"I have won't answer now."

"The need for lying is past," she answered with the most absolute candour. "The French police wrote quite truthfully all they knew. They had found the body of a suicide, whom I identified as my sister. To strengthen matters I had begged someone I knew also to identify the dead girl as Nesta. She was a married woman, too, the poor little dead one! So it was quite simple. And I took Nesta home—home to Chateau Varigny. I had married by then. But she had learned of my marriage through friends in

Italy and wrote to me from there, telling me of her misery with you and begging me to succour her. So I went to Italy and brought her back with me to Varigny. Then I planned that you should believe her dead. It was all very simple," she repeated complacently.

"But what was your object in all this? Why did you scheme to keep me in ignorance? What was your purpose?"

"Why?" Her voice deepened suddenly, the placid satisfaction with which she had narrated the carrying out of her plan disappearing from it completely. "Why? I did it to punish you—first for stealing my Nesta from me and then because, after you had stolen her, you brought her nothing but misery and heart-break. She was so young—so young! And you, with your hideous temper and your cold, formal English ways—you broke her heart, you crushed her!"

"She was old enough to coquette with every man she met," came grimly between Tormarin's teeth. "No husband—English or Italian, least of all Italian—would have endured her conduct."

"She would not have yielded to other men if you had loved her. She was all fire. And you—you were like a wet log that will not burn!" She gestured fiercely. "You never loved her! It was in a moment of passion—of desire that you married her! . . . But you were sure, eventually, to meet some other woman and learn what love—real love—is. So I waited. And when I saw that at Montavon with Jean—I knew that the day I had waited for so long would come at last. I knew that your punishment was ready to my hand."

"Do you mean"—Blaise spoke in curiously measured accents—"do you mean that you deliberately concealed the fact that Nesta still lived to that?"

"So that you should not marry the woman that you loved when the time came! Yes, I planned it all! I kept Nesta safely hidden at Varigny, and I made little changes in her appearance—a woman can, you know—mockingly—"the colour of her hair, the way of dressing it. Oh, just little changes, so that if by chance she was seen in the street by anyone who had known her as your wife she would not easily be recognized. Oh—once more with that, expatiating complacence at her own skill in deception—"I thought of every little detail."

Tormarin stood listening to her silently, like a man in a trance. His

face had grown drawn and haggard, and his eyes burned in their sockets. Once, as she poured out her story of trickery and deception, she heard him mutter dazedly: "Jean. . . Jean." And the anguish in his voice might have moved any woman to pity save only one who was utterly and entirely obsessed with the desire for vengeance.

But the intolerable suffering which had suddenly lashed his face and rimmed his mouth with white beads of sweat was meat and drink to her. She glowered in it. This was her hour of triumph after the long years of waiting.

"She smiled at him blankly.

"I think I have behaved very well," she pursued. "I might have waited till you were actually married. But I have no wish to punish the little Jean. She, at least, is 'on the square,' as you say—though it would have revenged my Nesta well. Jean, I waited. You ruined Nesta's life; I could have ruined the life of the woman you love. I did think of it. Ah! You would have suffered then, knowing that the Jean you worshipped was neither wife nor maid, but a—"

"Be silent, woman!"

(To Be Continued.)

It is usually easy to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestive and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Another British Invention

Glowgram For Theatres Can Be Read In The Dark

Theatres and cinemas will soon provide a new type of programme—called a glowgram—which may be read in the dark. Glowgrams are black cellulose, non-rustle, non-inflammable sheets with the printing in transparent type. All you have to do is raise them so that the light of the stage or screen is behind them. The writing is then perfectly legible. They are a British invention.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother's Own Worm Extremator to drive out the parasites.

A naturalist says that many flies can travel faster than an express train. And he forgot to add, many others think they can.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. O. Landry, Moncton, N.B., writes:—"I can certainly recall Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

"Three Good, Healthy Reasons" for Praise

"I have three good, healthy reasons for giving the praise of BABY'S OWN TABLETS—two lovely boys and a girl, all of whom have been greatly benefited by the Tablets during babyhood," writes Mrs. Judith Millett, Moncton, N.B.

"If more BABY'S OWN TABLETS were used there would be fewer sick babies," writes Mrs. Lewis Weldon, Moncton, N.B.

"I would not be without BABY'S OWN DR. WILLIAMS' TABLETS."

T. J. HARDWICK, STONY PLAIN.

The Final Baseball Game.

The long-delayed contest which was to decide who was the better ball team in the Northwest League took place in Stony on Sunday afternoon last.

Mr G Magwood, Onoway's premier sportsman, was on deck early with his bunch of good hitters; and was followed in a short time by the players from the mining town Wabamun, chaperoned by Mr Wabamun.

The Miners hadn't brought with them their mascot, or, for that matter, any other token which might bring them luck, as from the start of the game, the Onowayons began piling up a bunch of runs, culminating in the final score of 21.

The Wabboys were never real contenders at any time of the game, but this did not deter them from doing a lot of protesting; in fact, individually and collectively, they were the season's champion protesters, finally concentrating on the umpire, Philip Enders, whose removal they demanded, and this was acceded to at the end of the 3d innings.

Stony's pioneer ball player, Mike Zucht, then took on the umpiring job, but the Miners found their position was not greatly bettered by the change as the runs against them kept piling up.

Final score: Wabamun 9, Onoway 21.

And now for Hockey! In this connection it has been suggested that the first game of hockey the coming season be played between last season's leaders in the N.W. Hockey league—these being Magwood's Pets, from Onoway, and Eddie Mayer's Nitpickers.

Golf Gossip.

In the golf tournament held on Labor day the President's side emerged victorious over the V. Pres. side, by 8 games to 7, and 995 strokes to 994. Could anyone wish it closer?

After the close of the regular play, 6 ladies were matched with 6 gents. After the smoke of battle had cleared, the gents emerged victorious by 4 to 2.

If the ladies improve at the same rate that they have in the past, they will be on a par with the gents.

The kindness of the Weatherman, as well as the lunch the ladies provided, made the day a success.

The Executive have arranged another Knock-out Tournament. Four prizes are being offered for the two fight. The men's finalist meets the two ladies' finalist for the cup recently won by Miss Lucy Enders.

Don't forget the "two bits" entry fee. This is to buy prizes.

"Lady Learning to Drive, Kills Two." Headline in a daily paper. A good start for one just taking up golf.

R. W. "I see the Executive Committee has made my handicap plus four."

Doc: "Yes, plus fours are a big handicap."

First golfer (despairing)—"There must be better golfers than I."

Jack: "Yes, but they don't play."

The Weekly Runaway.

Stony Plain's weekly team-o'-horses runaway occurred on Tuesday Aft. at 2:15. The horses, hitched to a wagon loaded with 2-inch lumber, started at the Armbruster mill and did the quarter-mile up hill in about record time, considering that a few ill-advised gents attempted to stop 'em. The equines ran the whole gamut of parked cars and wagons and reached the Summerfield corner with practically everything intact, having dropped carry a barrel.

Seeing that this is becoming one of Stony's regular outdoor sports, whassa matter with getting up a runaway competition, and getting a committee of golfers to arrange the handicaps?

Stony Plain and District

Miss L. Wolfe of Portland, Ore., and Mrs F H Rowell of Vancouver are visiting here with their parents, Mr and Mrs A Wolfe.

Mr Emil H Baron, proprietor of Stony Plain Motors, returned Saturday evening from an aero trip to Calgary. Sunday morning he and Mrs Baron left for Grand Prairie by motor, on a visit to Mrs Baron's sister.

Mr Paul Comisarow has not resumed his studies at S. P. High, but will shortly enter a business college in the City.

Eric Heichen, a former resident, paid us a visit Sunday last. He had accompanied Onoway's victorious baseball aggregation.

On Friday afternoon last Mrs. Gates, superintendent of United church Sunday school, entertained the scholars on the lawn at her residence. About fourscore pupils were present and enjoyed themselves in a very hearty manner.

What promises to be an interesting police court case is billed to be heard at the town hall on Monday next, when some ratepayers from Hansen S.D. will air their grievances.

The Young General Store is receiving a coat of paint, this week, at the hands of Decorator Mohr.

M. Mecklenburg, the celebrated Optician, with offices at 10229 101st St. Edmonton will be at the Royal Hotel, Stony Plain, Sat., Sept. 17, from 9 to 3.

BUTTER AND EGGS WANTED at The Royal Cafe

Honk! Honk!!

Biff bang! The duck season opens at noon today. (Thurs.). Stony Plain Hardware has the right shotgun shells to bring 'em down, and the Sunman sells you the license to shoot 'em.

Hansen's Corners.

There was a great victory for the McDonalds at the school election at Hansen's Corner on Saturday, when Don McDonald was elected.

Don McDonald had the misfortune of having a finger crushed under a barrel of krant.

Threshing is now in full swing in this district.

Some of Hansen's farmers believe there's good prospects for dollar wheat.

There promises to be a big gathering of Hansenites in Stony's town hall on Monday afternoon.

Spruce Grove News.

Threshing is now general in this district, and reports show that the grain, with few exceptions, is turning up to expectations.

Mr Jac Brox was a business visitor to Stony on Monday.

The Municipal office is being wired this week.

The Spruce Grove Lutheran church (Manitoba Synod) is being re-painted.

There is still some doubt whether the body found on the river on Labor Day is that of a former resident of the Grove.

Considerable grain is being hauled to the elevators at the present time.

The local students of Concordia College are getting ready to return to their Alma Mater.

Mr. Harry Brox has signified his intention of taking lessons in aviation from a U. S. correspondence school.

Mecklenburg the Optician will be at Spruce, Grove Sat. next, Sept. 17, from 3 to 8.

Bus Time Table.

Stops at Royal Cafe.
To Edmonton, 9:40.
To Evansburg, 17:40.

Railway Time Table
